Subject Index of Volumes B18 and B19

Absorptive sensitivity
  electronic mechanism for absorptive sensitivity in semiconductor gas sensors, **19**, 426
Accumulation layer model
  accumulation layer model for Ga_2O_3 thin-film gas sensors based on the Volkenstein theory of catalysis, **18**, 125
Acetylcholine esterase
  detection of inhibitory compounds of acetylcholine esterase with a novel ion responding impedance sensor (IRIS), **18**, 175
Acidification
  study of the relationship between extracellular acidification and cell viability by a silicon-based sensor, **19**, 368
Acoustic resonators
  significance of mass and viscous loads discrimination for an AT-quartz blood group immunosensor, **19**, 698
Aircraft sensors
  space and aircraft sensors, **18**, 22
Aluminium
  capacitive humidity sensor with controlled performances, based on porous Al_2O_3 thin film grown on SiO_2–Si substrate, **19**, 551
Ammonia sensors
  development of a thick film ammonia sensor for livestock buildings, **18**, 296
  an optochemical ammonia sensor based on immobilized metalloporphyrins, **19**, 493
Ammonium
  potentiometric silicon microsensor for nitrate and ammonium, **18**, 51
Anionic detergents
  a new ISFET device responsive to anionic detergents, **19**, 321
Antigens
  fiber optic immunosensors based on enhanced chemiluminescence and their application to determine different antigens, **18**, 161
Array sensor system
  a brief history of electronic noses, **18**, 211
Artificial neural networks
  identification of gases with classical pattern-recognition methods and artificial neural networks, **18**, 259
Atmospheric corrosion
  a thick film sensor for atmospheric corrosion testing, **19**, 558

Backside membrane structures
  backside membrane structures for ISFETs applied in miniature analysis systems, **19**, 333
Beer flavour monitoring
  a multisensor system for beer flavour monitoring using an array of conducting polymers and predictive classifiers, **18**, 240
Binding proteins
  concepts of artificial affinity systems for sensor development, **19**, 694
Biochemical sensors
  integrated optical difference interferometer as biochemical sensor, **18**, 183
  integrated optical output grating coupler as biochemical sensor, **19**, 581
  thin-film microsystem applicable in (bio)chemical sensors, **19**, 597
Biochemical sensor array
  chemical and biochemical sensor array for two-dimensional imaging of analyte distributions, **18**, 229
Biomedical use
  low cost ceramic sensors for biomedical use: a revolution in transcutaneous blood oxygen monitoring?, **18**, 171
Bioreactor
  cholinesterase based bioreactor for determination of pesticides, **19**, 689
Biosensors
  third-generation glucose biosensor incorporated in a conducting printing ink, **18**, 166
  dehydrogenase-based thick-film biosensors for lactate and malate, **18**, 235
Bloodgas analysis
  integrated pO_2, pCO_2, pH sensor system for online blood monitoring, **19**, 704
Blood groups
  significance of mass and viscous loads discrimination for an AT-quartz blood group immunosensor, **19**, 698
Blood oxygen
  low cost ceramic sensors for biomedical use: a revolution in transcutaneous blood oxygen monitoring?, **18**, 171

Cadmium selenide films
  the causes of thickness dependence of CdSe and CdS gas-sensor sensitivity to oxygen, **19**, 464
Cadmium sulfide
  dependence of sensitivity and reproducibility of CdS oxygen sensors, **19**, 460
Calcium
  universal approach for the fabrication of Ca^{2+}-, K^+- and NO_3^--sensitive membrane ISFETs, **18**, 200
Calcium sensor
  Ca^{2+} sensor with amphiphilic Langmuir–Blodgett membranes, **18**, 60
Calibration curves
  calibration curve for SnO_2-based gas sensors, **19**, 466
Capacitance
  a study of the conductance and capacitance of pure and Pd-doped SnO_2 thick films, **19**, 720
Carbon dioxide sensors
  reliable CO_2 sensors with silicon-based polymers on quartz microbalance transducers, **19**, 415
Carbon monoxide
  the influence of water vapour on carbon monoxide sensitivity of α-Fe_2O_3 microporous ceramic sensors, **19**, 437
  the influence of rhodium on SnO_2–CO gas sensor, **19**, 500
  CO determination in air by YSZ-based sensors, **19**, 566
Catalysis
  accumulation layer model for Ga_2O_3 thin-film gas sensors based on the Volkenstein theory of catalysis, **18**, 125

Cell viability
study of the relationship between extracellular acidification and cell viability by a silicon-based sensor, **19**, 368
Ceramic sensors
low cost ceramic sensors for biomedical use: a revolution in transcutaneous blood oxygen monitoring?, **18**, 171
Chalcogenide glass sensors
chalcogenide glass chemical sensors for determination of thallium in natural and waste water, **19**, 373
CHEMFETs
enhanced performance of potassium CHEMFETs by optimization of a polysiloxane membrane, **18**, 38
Chemical sensing
possibilities of chemical sensing at the semiconductor/electrolyte interface, **19**, 315
Chemical-sensitive coatings
inclusion of organic vapours by crystalline hosts. Chemical-sensitive coatings for sensor applications, **18**, 77
Chemical sensors
new materials and transducers for chemical sensors, **18**, 1
application of organic supramolecular and polymeric compounds for chemical sensors, **18**, 71
electrostatically excited and capacitively detected flexural plate waves on thin silicon nitride membranes with chemical sensor applications, **18**, 103
a new method to analyse signal transients in chemical sensors, **18**, 308
chalcogenide glass chemical sensors for determination of thallium in natural and waste water, **19**, 373
Chemical sensor array
chemical and biochemical sensor array for two-dimensional imaging of analyte distributions, **18**, 229
Chemical vapour deposition
tin dioxide thin-film gas sensor prepared by chemical vapour deposition. Influence of grain size and thickness on the electrical properties, **18**, 195
Chemiluminescence
fiber optic immunosensors based on enhanced chemiluminescence and their application to determine different antigens, **18**, 161
Chemo-optical sensing
chemo-optical sensing by SERS at organically modified surfaces, **18**, 188
Chlorinated hydrocarbons
a solid electrolyte sensor as an alarm device to detect chlorinated hydrocarbons in exhaust gas, **19**, 515
Choline ester derivatives
cholinesterase based bioreactor for determination of pesticides, **19**, 689
Cholinesterase
cholinesterase based bioreactor for determination of pesticides, **19**, 689
Chromatographic detectors
SnO_2-based gas sensors as chromatographic detectors, **19**, 470
Cluster model
a cluster approach for the SnO_2 (110) face, **19**, 716
Coadsorption
coadsorption and cross sensitivity on high temperature semiconducting metal oxides: water effect on the coadsorption process, **18**, 113
influence of water on the coadsorption of oxidizing and reducing gases on the β-Ga_2O_3 surface, **18**, 138
effect of coadsorption of reducing gases on the conductivity of β-Ga_2O_3 thin films in the presence of O_2, **19**, 573
Combustion
the characterization of semiconductor gas sensors. II: A critical comparison with respect to products of combustion, **19**, 668
Conductance
a study of the conductance and capacitance of pure and Pd-doped SnO_2 thick films, **19**, 720
Conducting polymers
towards an integrated electronic nose using conducting polymer sensors, **18**, 221
a multisensor system for beer flavour monitoring using an array of conducting polymers and predictive classifiers, **18**, 240
Conductivity
effect of coadsorption of reducing gases on the conductivity of β-Ga_2O_3 thin films in the presence of O_2, **19**, 573
Conductivity cells
impedance spectroscopy on non-conventional conductivity cells, **19**, 389
Conductivity probe
design of a miniature electrolyte conductivity probe using ISFETs in a four point configuration, **19**, 404
Continuous flow monitoring
nitrate sensor system for continuous flow monitoring, **19**, 362
Corrosion behaviour
Auger and SIMS study of segregation and corrosion behaviour of some semiconducting oxide gas-sensor materials, **19**, 569
Cross sensitivity
coadsorption and cross sensitivity on high temperature semiconducting metal oxides: water effect on the coadsorption process, **18**, 113
cross-sensitivity of various doped strontium titanate films to CO, CO_2, H_2, H_2O and CH_4, **19**, 529
Crown ethers
$PbOH^+$-selective membrane electrode based on crown ethers, **19**, 383
Crystalline hosts
inclusion of organic vapours by crystalline hosts. Chemical-sensitive coatings for sensor applications, **18**, 77

Dissolution
high Na^+ selectivity of Li_2O–Al_2O_3–B_2O_3–SiO_2 glass electrodes spoiled by network hydrolysis and dissolution, **19**, 387

Electrical properties
tin dioxide thin-film gas sensor prepared by chemical vapour deposition. Influence of grain size and thickness on the electrical properties, **18**, 195
preparation, development of microstructure, electrical and gas-sensitive properties of pure and doped SnO_2 powders, **19**, 474
Electrochemical studies
electrochemical studies on chemically modified smooth platinum square electrodes, **19**, 348
Electrode material
the influence of the electrode material on the sensitivity of an SnO_2 thick-film gas sensor, **19**, 453
Electrolyte concentration
ISFET responses on a stepwise change in electrolyte concentration at constant pH, **18**, 56
Electrolyte conductance cell
new operational modes for the Ta_2O_5-based electrolyte conductance cell, **18**, 65

Electrolyte solutions (immiscible)
mathematical modelling of the interface of two immiscible electrolyte solutions, **18**, 42
Electronic noses
a brief history of electronic noses, **18**, 211
towards an integrated electronic nose using conducting polymer sensors, **18**, 221
Electronic structure
a cluster approach for the SnO_2 (110) face, **19**, 716
Electrooptical gas sensor
electrooptical infrared compact gas sensor, **19**, 682
Enzymatic activity
monitoring of enzymatic activity and quantitative measurements of substrates by means of a newly designed silicon-based potentiometric sensor, **18**, 178
Enzyme
concepts of artificial affinity systems for sensor development, **19**, 694
Essential fatty acids
enzymatic flow-injection analysis for essential fatty acids, **19**, 607
Evanescent wave sensor
fiber-optic evanescent wave sensor for *in situ* determination of non-polar organic compounds in water, **18**, 291
Exhaust gases
a solid electrolyte sensor as an alarm device to detect chlorinated hydrocarbons in exhaust gas, **19**, 515
Exhaust gas mixtures
lambda detection with thin-film metal oxides using synthetic exhaust gas mixtures, **18**, 132

Fermentation
automated glucose measurement with microstructured thin-layer biosensors for the control of fermentation processes, **19**, 603
FETs
modelling the gas-sensing behaviour of SnO_2-gate FETs, **19**, 540
voltage dependence of gas-sensing behaviour of SnO_2-gate FETs, **19**, 543
evaluation of gas mixtures with different sensitive layers incorporated in hybrid FET structures, **19**, 678
Fibre-optic evanescent wave sensor
fiber-optic evanescent wave sensor for *in situ* determination of non-polar organic compounds in water, **18**, 291
Fibre optic immunosensors
fiber optic immunosensors based on enhanced chemiluminescence and their application to determine different antigens, **18**, 161
Field effect transistor
integrated pO_2, pCO_2, pH sensor system for online blood monitoring, **19**, 704
Flexural plate waves
electrostatically excited and capacitively detected flexural plate waves on thin silicon nitride membranes with chemical sensor applications, **18**, 103
Flow-injection analysis
enzymatic flow-injection analysis for essential fatty acids, **19**, 607
method and apparatus for the detection of the binding reaction of immunoglobulins, **19**, 610
Flue gases
sensor for on-line *in situ* measurement of soot concentration in flue gases, **19**, 546

Food freshness
characterisation of food freshness with sensor arrays, **18**, 282
Frequency effect
frequency effect on highly sensitive NO_2 sensors based on RGTO SnO_2(Al) thin films, **19**, 497

Gallium
effect of the sensor structure on the stability of Ga_2O_3 sensors for reducing gases, **18**, 119
accumulation layer model for Ga_2O_3 thin-film gas sensors based on the Volkenstein theory of catalysis, **18**, 125
influence of water on the coadsorption of oxidizing and reducing gases on the β-Ga_2O_3 surface, **18**, 138
effect of coadsorption of reducing gases on the conductivity of β-Ga_2O_3 thin films in the presence of O_2, **19**, 573
Gas analysis
self-organizing multisensor systems for odour classification: internal categorization, adaptation and drift rejection, **18**, 244
gas analysis with nonselective sensors, **19**, 665
Gas detection
using the quartz crystal microbalance principle for gas detection with reversible and irreversible sensors, **19**, 429
domestic gas detection system using two SnO_2 integrated sensors, **19**, 658
Gas flow
PVDF-excited resonance sensors for gas flow and humidity measurements, **19**, 554
Gas mixtures
evaluation of gas mixtures with high-temperature gas sensors based on silicon carbide, **19**, 562
Gas sensing
modelling the gas-sensing behaviour of SnO_2-gate FETs, **19**, 540
voltage dependence of gas-sensing behaviour of SnO_2-gate FETs, **19**, 543
the effects of signal conditioning and quantization upon gas and odour sensing system performance, **19**, 649
sensor arrays calibration with enhanced neural networks, **19**, 654
Gas-sensing properties
Langmuir–Blodgett films of an asymmetrically substituted phthalocyanine. Improved gas-sensing properties, **19**, 411
Gas-sensitive properties
preparation, development of microstructure, electrical and gas-sensitive properties of pure and doped SnO_2 powders, **19**, 474
Gas sensitivity
gas sensitivity of phthalocyanine thin films, **19**, 489
Gas sensors
nanocrystalline metal oxide gas sensors, **18**, 99
effect of the sensor structure on the stability of Ga_2O_3 sensors for reducing gases, **18**, 119
accumulation layer model for Ga_2O_3 thin-film gas sensors based on the Volkenstein theory of catalysis, **18**, 125
electronic mechanism for absorptive sensitivity in semiconductor gas sensors, **19**, 426
gas sensitivity of semiconductor Fe_2O_3-based thick-film sensors to CH_4, H_2, and NH_3, **19**, 434
characteristics of diode humidity sensors based on SnO_2-sensing properties, **19**, 457
calibration curve for SnO_2-based gas sensors, **19**, 466
SnO_2-based gas sensors as chromatographic detectors, **19**, 470

in situ infrared and electrical characterization of tin dioxide gas sensors in nitrogen/oxygen mixtures at temperatures up to 720 K, **19**, 478
analysis of hydrogen fluoride with SnO_2 gas sensors, **19**, 483
the influence of rhodium on SnO_2–CO gas sensor, **19**, 500
sol–gel materials for gas-sensing applications, **19**, 506
heaters for gas sensors from thick conductive or resistive films, **19**, 535
evaluation of gas mixtures with high-temperature gas sensors based on silicon carbide, **19**, 562
fabrication of a hybrid field-effect structure for gas detection with diverse sensitive materials, **19**, 632
microstructural development during the oxidation process in SnO_2 thin films for gas sensors, **19**, 637
evaluation of gas mixtures with different sensitive layers incorporated in hybrid FET structures, **19**, 678
electrooptical infrared compact gas sensor, **19**, 682
a study of the conductance and capacitance of pure and Pd-doped SnO_2 thick films, **19**, 720

Gas-sensor materials
Auger and SIMS study of segregation and corrosion behaviour of some semiconducting oxide gas-sensor materials, **19**, 569

Glass electrodes
high Na^+ selectivity of Li_2O–Al_2O_3–B_2O_3–SiO_2 glass electrodes spoiled by network hydrolysis and dissolution, **19**, 387

Glass modified sensitive surface
glass modified sensitive surface thick film humidity sensor, **18**, 107

Glucose
microfabricated glucose, lactate, glutamate and glutamine thin-film biosensors, **19**, 587
performance of integrated glucose and lactate thin-film microbiosensors for clinical analysers, **19**, 592
automated glucose measurement with microstructured thin-layer biosensors for the control of fermentation processes, **19**, 603

Glucose biosensors
third-generation glucose biosensor incorporated in a conducting printing ink, **18**, 166

Glutamate
microfabricated glucose, lactate, glutamate and glutamine thin-film biosensors, **19**, 587

Glutamine
microfabricated glucose, lactate, glutamate and glutamine thin-film biosensors, **19**, 587

Heaters
heaters for gas sensors from thick conductive or resistive films, **19**, 535

Human immunodeficiency virus
HIV serology using piezoelectric immunosensors, **18**, 271

Humidity measurements
PVDF-excited resonance sensors for gas flow and humidity measurements, **19**, 554

Humidity sensitivity
simulation of a humidity-sensitive double-layer system, **18**, 303
humidity sensitivity of sputtered TiO_2 thin films, **19**, 525

Humidity sensors
a new surface acoustic wave humidity sensor based on a polyethynylfluorenol membrane, **18**, 82
a humidity sensor of a new type, **18**, 85
glass modified sensitive surface thick film humidity sensor, **18**, 107
characteristics of diode humidity sensors based on SnO_2-sensing properties, **19**, 457
capacitive humidity sensor with controlled performances, based on porous Al_2O_3 thin film grown on SiO_2–Si substrate, **19**, 551

Hybrid field-effect structure
fabrication of a hybrid field-effect structure for gas detection with diverse sensitive materials, **19**, 632

Hydrogen fluoride
analysis of hydrogen fluoride with SnO_2 gas sensors, **19**, 483

Hydrogen sulfide
H_2S response of WO_3 thin-film sensors manufactured by silicon processing technology, **19**, 486

Hydrolysis
high Na^+ selectivity of Li_2O–Al_2O_3–B_2O_3–SiO_2 glass electrodes spoiled by network hydrolysis and dissolution, **19**, 387

Immunoglobulins
method and apparatus for the detection of the binding reaction of immunoglobulins, **19**, 610

Immunosensors
fiber optic immunosensors based on enhanced chemiluminescence and their application to determine different antigens, **18**, 161
HIV serology using piezoelectric immunosensors, **18**, 271
significance of mass and viscous loads discrimination for an AT-quartz blood group immunosensor, **19**, 698

Impedance analyses
significance of mass and viscous loads discrimination for an AT-quartz blood group immunosensor, **19**, 698

Impedance spectroscopy
impedance spectroscopy on non-conventional conductivity cells, **19**, 389

Inhibitory compounds
detection of inhibitory compounds of acetylcholine esterase with a novel ion responding impedance sensor (IRIS), **18**, 175

Interfaces
mathematical modelling of the interface of two immiscible electrolyte solutions, **18**, 42

Interferometers
integrated optical difference interferometer as biochemical sensor, **18**, 183

Ion-exchangers
some properties of sulfate ion-selective PVC membranes based on a neutral carrier and ion-exchanger, **19**, 392
lead-selective electrodes based on liquid ion-exchangers, **19**, 396

Ion responding impedance sensors
detection of inhibitory compounds of acetylcholine esterase with a novel ion responding impedance sensor (IRIS), **18**, 175

Ion-selective electrodes
ion-selective electrodes in PVC matrix, **18**, 31

Iron
gas sensitivity of semiconductor Fe_2O_3-based thick-film sensors to CH_4, H_2, and NH_3, **19**, 434

Iron oxide
influence of water vapour on carbon monoxide sensitivity of α-Fe_2O_3 microporous ceramic sensors, **19**, 437

selective petrol vapour sensor based on an Fe_2O_3 thin film, **18**, 155
ISFET responses
ISFET responses on a stepwise change in electrolyte concentration at constant pH, **18**, 56
ISFETs
universal approach for the fabrication of Ca^{2+}-, K^+- and NO_3^--sensitive membrane ISFETs, **18**, 200
a new ISFET device responsive to anionic detergents, **19**, 321
backside membrane structures for ISFETs applied in miniature analysis systems, **19**, 333
photo-CVD silicon nitride thin layers as pH-ISFET sensitive membrane, **19**, 342
design of a miniature electrolyte conductivity probe using ISFETs in a four point configuration, **19**, 404
new photocurable composition for ISFET polymer membranes, **19**, 625

Lactate
dehydrogenase-based thick-film biosensors for lactate and malate, **18**, 235
microfabricated glucose, lactate, glutamate and glutamine thin-film biosensors, **19**, 587
performance of integrated glucose and lactate thin-film microbiosensors for clinical analysers, **19**, 592
Lambda detection
lambda detection with thin-film metal oxides using synthetic exhaust gas mixtures, **18**, 132
Lambda sensors
computer simulation of the surface energy barrier of oxidic semiconductors with mobile donors, **19**, 711
Langmuir–Blodgett films
Langmuir–Blodgett films of lanthanide diphthalocyanines as environmental tobacco smoke sensors, **18**, 89
an analysis of the pH-sensitive multilayer LB film/semiconductor structures, **19**, 336
Langmuir–Blodgett films of an asymmetrically substituted phthalocyanine. Improved gas-sensing properties, **19**, 411
Langmuir–Blodgett membranes
Ca^{2+} sensor with amphiphilic Langmuir–Blodgett membranes, **18**, 60
Lanthanides
Langmuir–Blodgett films of lanthanide diphthalocyanines as environmental tobacco smoke sensors, **18**, 89
Lanthanum
improved long-term stability for an LaF_3 based oxygen sensor, **18**, 148
Lead-selective electrodes
lead-selective electrodes based on liquid ion-exchangers, **19**, 396
Lead-selective membrane
$PbOH^+$-selective membrane electrode based on crown ethers, **19**, 383
Livestock buildings
development of a thick film ammonia sensor for livestock buildings, **18**, 296

Malate
dehydrogenase-based thick-film biosensors for lactate and malate, **18**, 235
Materials
new materials and transducers for chemical sensors, **18**, 1
Mathematical methods
gas analysis with nonselective sensors, **19**, 665
Mathematical modelling
mathematical modelling of the interface of two immiscible electrolyte solutions, **18**, 42
Metalloporphyrins
an optochemical ammonia sensor based on immobilized metalloporphyrins, **19**, 493
Metal oxides
coadsorption and cross sensitivity on high temperature semiconducting metal oxides: water effect on the coadsorption process, **18**, 113
lambda detection with thin-film metal oxides using synthetic exhaust gas mixtures, **18**, 132
Microelectrode array
array of individually addressable microelectrodes, **19**, 675
Micromachined enzyme reactor
a micromachined enzyme reactor in ⟨110⟩-oriented silicon, **19**, 614
Micro-organisms
non-invasive detection of micro-organisms using smart temperature sensors, **18**, 276
Microporous ceramic sensors
the influence of water vapour on carbon monoxide sensitivity of α-Fe_2O_3 microporous ceramic sensors, **19**, 437
Miniature analysis systems
backside membrane structures for ISFETs applied in miniature analysis systems, **19**, 333
Mobile oxygen-vacancy donors
computer simulation of the surface energy barrier of oxidic semiconductors with mobile donors, **19**, 711
Modelling
modelling the gas-sensing behaviour of SnO_2-gate FETs, **19**, 540
Modified polymers
modified polymers for reliable detection of organic solvents: thermodynamically controlled selectivities and sensitivities, **19**, 448
Molecular imprinting
sensors for low-weight organic molecules based on molecular imprinting technique, **19**, 629
Monte Carlo simulations
modelling and simulation of tin oxide based thick-film gas sensors using Monte Carlo techniques, **19**, 724
Multisensor array
a multisensor system for beer flavour monitoring using an array of conducting polymers and predictive classifiers, **18**, 240

Nanocrystalline metal oxide
nanocrystalline metal oxide gas sensors, **18**, 99
NASICON electrode
NASICON electrode for detecting sodium ions, **19**, 329
Neural emulator
an artificial neural emulator for an odour sensor array, **19**, 661
Neural networks
self-organizing multisensor systems for odour classification: internal categorization, adaptation and drift rejection, **18**, 244
feasibility of surface acoustic wave (SAW) sensor array processing with formal neural networks, **19**, 645
sensor arrays calibration with enhanced neural networks, **19**, 654
Neutral carriers
some properties of sulfate ion-selective PVC membranes based on a neutral carrier and ion-exchanger, **19**, 392

Nitrate
investigation of the stability of an optochemical nitrate sensor, **18**, 47
potentiometric silicon microsensor for nitrate and ammonium, **18**, 51
universal approach for the fabrication of Ca^{2+}-, K^+- and NO_3^--sensitive membrane ISFETs, **18**, 200
Nitrate detection
development of a sensor card with integrated reference for the detection of nitrate, **19**, 376
Nitrate sensor
temperature compensation for a nitrate sensor, **19**, 353
a selective and long-term stable nitrate sensor, **19**, 356
nitrate sensor system for continuous flow monitoring, **19**, 362
Nitro compounds
detection of nitro compounds by organic semiconductor sensors, **19**, 511
Nitrogen dioxide
an SnO_2 based switching tunnel device for the detection of NO_2 in air at the sub ppm level, **18**, 93
frequency effect on highly sensitive NO_2 sensors based on RGTO SnO_2(Al) thin films, **19**, 497

Odour sensing
the effects of signal conditioning and quantization upon gas and odour sensing system performance, **19**, 649
Odour sensor
an artificial neural emulator for an odour sensor array, **19**, 661
Optochemical sensors
investigation of the stability of an optochemical nitrate sensor, **18**, 47
Organic compounds
fiber-optic evanescent wave sensor for *in situ* determination of non-polar organic compounds in water, **18**, 291
Organic semiconductor sensors
detection of nitro compounds by organic semiconductor sensors, **19**, 511
Organic solvents
modified polymers for reliable detection of organic solvents: thermodynamically controlled selectivities and sensitivities, **19**, 448
Organic supramolecular compounds
application of organic supramolecular and polymeric compounds for chemical sensors, **18**, 71
Organic vapours
inclusion of organic vapours by crystalline hosts. Chemical-sensitive coatings for sensor applications, **18**, 77
Organophosphorus compounds
a surface acoustic wave gas sensor for organophosphorus compounds, **19**, 502
Output grating coupler
integrated optical output grating coupler as biochemical sensor, **19**, 581
Oxidic semiconductors
computer simulation of the surface energy barrier of oxidic semiconductors with mobile donors, **19**, 711
Oxidizing gases
influence of water on the coadsorption of oxidizing and reducing gases on the β-Ga_2O_3 surface, **18**, 138
Oxygen
the causes of thickness dependence of CdSe and CdS gas-sensor sensitivity to oxygen, **19**, 464
Oxygen monitoring
low cost ceramic sensors for biomedical use: a revolution in transcutaneous blood oxygen monitoring?, **18**, 171
Oxygen sensors
improved long-term stability for an LaF_3 based oxygen sensor, **18**, 148
dependence of sensitivity and reproducibility of CdS oxygen sensors, **19**, 460
Oxygen vacancies
a cluster approach for the SnO_2 (110) face, **19**, 716

Pattern-recognition methods
identification of gases with classical pattern-recognition methods and artificial neural networks, **18**, 259
pCO_2
integrated pO_2, pCO_2, pH sensor system for online blood monitoring, **19**, 704
Pesticides
cholinesterase based bioreactor for determination of pesticides, **19**, 689
Petrol vapour sensor
selective petrol vapour sensor based on an Fe_2O_3 thin film, **18**, 155
pH-ISFET
photo-CVD silicon nitride thin layers as pH-ISFET sensitive membrane, **19**, 342
Photochemical vapour deposition
photo-CVD silicon nitride thin layers as pH-ISFET sensitive membrane, **19**, 342
Photocuring
new photocurable composition for ISFET polymer membranes, **19**, 625
pH sensor
a new pH sensor with a PVC membrane: analytical evaluation and mechanistic aspects, **19**, 400
integrated pO_2, pCO_2, pH sensor system for online blood monitoring, **19**, 704
Phthalocyanine
Langmuir–Blodgett films of an asymmetrically substituted phthalocyanine. Improved gas-sensing properties, **19**, 411
gas sensitivity of phthalocyanine thin films, **19**, 489
Phthalocyanine films
improving the SAW gas sensor: device, electronics and sensor layer, **19**, 443
Platinum electrode
electrochemical studies on chemically modified smooth platinum square electrodes, **19**, 348
pO_2
integrated pO_2, pCO_2, pH sensor system for online blood monitoring, **19**, 704
Polyethynylfluorenol membrane
a new surface acoustic wave humidity sensor based on a polyethynylfluorenol membrane, **18**, 82
Polymeric compounds
application of organic supramolecular and polymeric compounds for chemical sensors, **18**, 71
Polymer membranes
influence of silver salts in the polymer membrane of potassium-selective electrodes, **19**, 359
new photocurable composition for ISFET polymer membranes, **19**, 625
Polymer thin-film resistors
gas and vapour effects on the resistance fluctuation spectra of conducting polymer thin-film resistors, **19**, 421

Polysiloxane membrane
enhanced performance of potassium CHEMFETs by optimization of a polysiloxane membrane, **18**, 38
Potassium
enhanced performance of potassium CHEMFETs by optimization of a polysiloxane membrane, **18**, 38
universal approach for the fabrication of Ca^{2+}-, K^+- and NO_3^--sensitive membrane ISFETs, **18**, 200
Potassium-selective electrodes
influence of silver salts in the polymer membrane of potassium-selective electrodes, **19**, 359
Potentiometric microsensors
potentiometric silicon microsensor for nitrate and ammonium, **18**, 51
Potentiometric sensor
monitoring of enzymatic activity and quantitative measurements of substrates by means of a newly designed silicon-based potentiometric sensor, **18**, 178
Predictive classifiers
a multisensor system for beer flavour monitoring using an array of conducting polymers and predictive classifiers, **18**, 240
Printing ink
third-generation glucose biosensor incorporated in a conducting printing ink, **18**, 166
PVC membranes
ion-selective electrodes in PVC matrix, **18**, 31
some properties of sulfate ion-selective PVC membranes based on a neutral carrier and ion-exchanger, **19**, 392
a new pH sensor with a PVC membrane: analytical evaluation and mechanistic aspects, **19**, 400
PVDF
PVDF-excited resonance sensors for gas flow and humidity measurements, **19**, 554
Pyridinophanes
silver-selective membrane electrode based on pyridinophanes, **19**, 380

Quartz crystal microbalance
using the quartz crystal microbalance principle for gas detection with reversible and irreversible sensors, **19**, 429
quartz crystal microbalance sensor in liquids, **19**, 518
Quartz microbalance transducers
reliable CO_2 sensors with silicon-based polymers on quartz microbalance transducers, **19**, 415

Receptor sites
concepts of artificial affinity systems for sensor development, **19**, 694
Reducing gases
effect of the sensor structure on the stability of Ga_2O_3 sensors for reducing gases, **18**, 119
influence of water on the coadsorption of oxidizing and reducing gases on the β-Ga_2O_3 surface, **18**, 138
effect of coadsorption of reducing gases on the conductivity of β-Ga_2O_3 thin films in the presence of O_2, **19**, 573
Resistance fluctuation spectra
gas and vapour effects on the resistance fluctuation spectra of conducting polymer thin-film resistors, **19**, 421
Resonance sensors
PVDF-excited resonance sensors for gas flow and humidity measurements, **19**, 554
Rhodium
the influence of rhodium on SnO_2–CO gas sensor, **19**, 500

Screen-printed SnO_2 films
a study of the conductance and capacitance of pure and Pd-doped SnO_2 thick films, **19**, 720
Semiconducting metal oxides
coadsorption and cross sensitivity on high temperature semiconducting metal oxides: water effect on the coadsorption process, **18**, 113
Semiconductor/electrolyte interface
possibilities of chemical sensing at the semiconductor/electrolyte interface, **19**, 315
Semiconductor gas sensors
the characterization of semiconductor gas sensors. II: A critical comparison with respect to products of combustion, **19**, 668
computer simulation of the surface energy barrier of oxidic semiconductors with mobile donors, **19**, 711
Sensitivity
the causes of thickness dependence of CdSe and CdS gas-sensor sensitivity to oxygen, **19**, 464
Sensor applications
inclusion of organic vapours by crystalline hosts. Chemical-sensitive coatings for sensor applications, **18**, 77
Sensor arrays
self-organizing multisensor systems for odour classification: internal categorization, adaptation and drift rejection, **18**, 244
response pattern of SnO_2 sensor system for smoke of different origins, **18**, 264
characterisation of food freshness with sensor arrays, **18**, 282
sensor arrays calibration with enhanced neural networks, **19**, 654
Sensor card
development of a sensor card with integrated reference for the detection of nitrate, **19**, 376
Sensors
sensors for low-weight organic molecules based on molecular imprinting technique, **19**, 629
gas analysis with nonselective sensors, **19**, 665
concepts of artificial affinity systems for sensor development, **19**, 694
Sensor structure
effect of the sensor structure on the stability of Ga_2O_3 sensors for reducing gases, **18**, 119
Signal conditioning
the effects of signal conditioning and quantization upon gas and odour sensing system performance, **19**, 649
Signal transients
a new method to analyse signal transients in chemical sensors, **18**, 308
Silicon
potentiometric silicon microsensor for nitrate and ammonium, **18**, 51
sinusoidal temperature modulation of the Si-Planar-Pellistor, **18**, 143
monitoring of enzymatic activity and quantitative measurements of substrates by means of a newly designed silicon-based potentiometric sensor, **18**, 178
study of the relationship between extracellular acidification and cell viability by a silicon-based sensor, **19**, 368
capacitive humidity sensor with controlled performances, based on porous Al_2O_3 thin film grown on SiO_2–Si substrate, **19**, 551
a micromachined enzyme reactor in ⟨110⟩-oriented silicon, **19**, 614

Silicon-based polymers
reliable CO_2 sensors with silicon-based polymers on quartz microbalance transducers, **19**, 415
Silicon carbide
evaluation of gas mixtures with high-temperature gas sensors based on silicon carbide, **19**, 562
Silicon nitride
electrostatically excited and capacitively detected flexural plate waves on thin silicon nitride membranes with chemical sensor applications, **18**, 103
photo-CVD silicon nitride thin layers as pH-ISFET sensitive membrane, **19**, 342
Silver salts
influence of silver salts in the polymer membrane of potassium-selective electrodes, **19**, 359
Silver-selective membrane
silver-selective membrane electrode based on pyridinophanes, **19**, 380
Simulation
simulation of a humidity-sensitive double-layer system, **18**, 303
Si-Planar-Pellistor
sinusoidal temperature modulation of the Si-Planar-Pellistor, **18**, 143
Smoke sensors
Langmuir–Blodgett films of lanthanide diphthalocyanines as environmental tobacco smoke sensors, **18**, 89
response pattern of SnO_2 sensor system for smoke of different origins, **18**, 264
Sodium
NASICON electrode for detecting sodium ions, **19**, 329
Sodium selectivity
high Na^+ selectivity of Li_2O–Al_2O_3–B_2O_3–SiO_2 glass electrodes spoiled by network hydrolysis and dissolution, **19**, 387
Sol–gel materials
sol–gel materials for gas-sensing applications, **19**, 506
Solid electrolyte sensors
a solid electrolyte sensor as an alarm device to detect chlorinated hydrocarbons in exhaust gas, **19**, 515
Soot concentration
sensor for on-line *in situ* measurement of soot concentration in flue gases, **19**, 546
Space sensors
space and aircraft sensors, **18**, 22
Spectroscopic studies
Auger and SIMS study of segregation and corrosion behaviour of some semiconducting oxide gas-sensor materials, **19**, 569
Stability
effect of the sensor structure on the stability of Ga_2O_3 sensors for reducing gases, **18**, 119
improved long-term stability for an LaF_3 based oxygen sensor, **18**, 148
Strontium titanate
cross-sensitivity of various doped strontium titanate films to CO, CO_2, H_2, H_2O and CH_4, **19**, 529
Sulfate ion-selective membrane
some properties of sulfate ion-selective PVC membranes based on a neutral carrier and ion-exchanger, **19**, 392
Surface acoustic waves
a new surface acoustic wave humidity sensor based on a polyethynylfluorenol membrane, **18**, 82
feasibility of surface acoustic wave (SAW) sensor array processing with formal neural networks, **19**, 645
Surface acoustic wave gas sensors
improving the SAW gas sensor: device, electronics and sensor layer, **19**, 443
a surface acoustic wave gas sensor for organophosphorus compounds, **19**, 502
Surface energy barrier
computer simulation of the surface energy barrier of oxidic semiconductors with mobile donors, **19**, 711
Surface-enhanced Raman scattering
chemo-optical sensing by SERS at organically modified surfaces, **18**, 188
Surface reaction modelling
modelling and simulation of tin oxide based thick-film gas sensors using Monte Carlo techniques, **19**, 724
Switching tunnel device
an SnO_2 based switching tunnel device for the detection of NO_2 in air at the sub ppm level, **18**, 93

Tantalum pentoxide
new operational modes for the Ta_2O_5-based electrolyte conductance cell, **18**, 65
Temperature compensation
temperature compensation for a nitrate sensor, **19**, 353
Temperature modulation
sinusoidal temperature modulation of the Si-Planar-Pellistor, **18**, 143
Temperature sensors
non-invasive detection of micro-organisms using smart temperature sensors, **18**, 276
Thallium determination
chalcogenide glass chemical sensors for determination of thallium in natural and waste water, **19**, 373
Thick-film gas sensors
the influence of the electrode material on the sensitivity of an SnO_2 thick-film gas sensor, **19**, 453
synthesis and characterization of tin dioxide powders for the realization of thick-film gas sensors, **19**, 621
a study of the conductance and capacitance of pure and Pd-doped SnO_2 thick films, **19**, 720
Thick-film sensors
dehydrogenase-based thick-film biosensors for lactate and malate, **18**, 235
gas sensitivity of semiconductor Fe_2O_3-based thick-film sensors to CH_4, H_2, and NH_3, **19**, 434
modelling and simulation of tin oxide based thick-film gas sensors using Monte Carlo techniques, **19**, 724
Thin-film biosensors
microfabricated glucose, lactate, glutamate and glutamine thin-film biosensors, **19**, 587
Thin-film gas sensors
tin dioxide thin-film gas sensor prepared by chemical vapour deposition. Influence of grain size and thickness on the electrical properties, **18**, 195
Thin-film microbiosensors
performance of integrated glucose and lactate thin-film microbiosensors for clinical analysers, **19**, 592
Thin-film microsystems
thin-film microsystem applicable in (bio)chemical sensors, **19**, 597
Thin-film sensors
H_2S response of WO_3 thin-film sensors manufactured by silicon processing technology, **19**, 486
Thin-layer biosensors
automated glucose measurement with microstructured thin-layer biosensors for the control of fermentation processes, **19**, 603

Tin dioxide
an SnO_2 based switching tunnel device for the detection of NO_2 in air at the sub ppm level, **18**, 93
tin dioxide thin-film gas sensor prepared by chemical vapour deposition. Influence of grain size and thickness on the electrical properties, **18**, 195
response pattern of SnO_2 sensor system for smoke of different origins, **18**, 264
the influence of the electrode material on the sensitivity of an SnO_2 thick-film gas sensor, **19**, 453
characteristics of diode humidity sensors based on SnO_2-sensing properties, **19**, 457
calibration curve for SnO_2-based gas sensors, **19**, 466
SnO_2-based gas sensors as chromatographic detectors, **19**, 470
preparation, development of microstructure, electrical and gas-sensitive properties of pure and doped SnO_2 powders, **19**, 474
in situ infrared and electrical characterization of tin dioxide gas sensors in nitrogen/oxygen mixtures at temperatures up to 720 K, **19**, 478
analysis of hydrogen fluoride with SnO_2 gas sensors, **19**, 483
frequency effect on highly sensitive NO_2 sensors based on RGTO SnO_2(Al) thin films, **19**, 497
the influence of rhodium on SnO_2–CO gas sensor, **19**, 500
modelling the gas-sensing behaviour of SnO_2-gate FETs, **19**, 540
voltage dependence of gas-sensing behaviour of SnO_2-gate FETs, **19**, 543
synthesis and characterization of tin dioxide powders for the realization of thick-film gas sensors, **19**, 621
microstructural development during the oxidation process in SnO_2 thin films for gas sensors, **19**, 637
domestic gas detection system using two SnO_2 integrated sensors, **19**, 658
Tin(IV) oxide
a cluster approach for the SnO_2 (110) face, **19**, 716
Tin oxide sensors
modelling and simulation of tin oxide based thick-film gas sensors using Monte Carlo techniques, **19**, 724
Titanium
humidity sensitivity of sputtered TiO_2 thin films, **19**, 525
Tobacco smoke sensors
Langmuir–Blodgett films of lanthanide diphthalocyanines as environmental tobacco smoke sensors, **18**, 89
Transducers
new materials and transducers for chemical sensors, **18**, 1
Triglyceride sensor
development and practical evaluation of an amperometric triglyceride sensor, **19**, 365
Tungsten trioxide
H_2S response of WO_3 thin-film sensors manufactured by silicon processing technology, **19**, 486

Viscometry
significance of mass and viscous loads discrimination for an AT-quartz blood group immunosensor, **19**, 698
Volkenstein theory
accumulation layer model for Ga_2O_3 thin-film gas sensors based on the Volkenstein theory of catalysis, **18**, 125
Voltage dependence
voltage dependence of gas-sensing behaviour of SnO_2-gate FETs, **19**, 543

Water effect
influence of water on the coadsorption of oxidizing and reducing gases on the β-Ga_2O_3 surface, **18**, 138
Water vapour
the influence of water vapour on carbon monoxide sensitivity of α-Fe_2O_3 microporous ceramic sensors, **19**, 437

YSZ-based sensors
CO determination in air by YSZ-based sensors, **19**, 566
Yttrium
CO determination in air by YSZ-based sensors, **19**, 566

Zirconium
CO determination in air by YSZ-based sensors, **19**, 566
